Preface	1
1 VueScan – Look and feel	3
1.1 Field of application	4
CMOS scanners	4
Drum scanners and Imacon/Hasselblad	4
1.2 Compatibility and license issues	6
Flexible licensing regulations	6
Standard vs. Professional edition	7
Try before you buy	7
1.3 VueScan GUI	10
Guide me - Beginner's mode	10
Advanced/Less — Extended mode	10
Advanced/More — Full display of all options	10
1.4 Dependencies - Automatic GUI changes	12
Dependencies are the key factor	12
Frequent GUI changes	12
1.5 Saving and restoring options	14
Reset to default values	14
2 Initial setup	15
2.1 Download and setup	16
2.2 Color management in a nutshell	18
2.3 Defining monitor color space	22
Software vs. hardware calibration	22
Monitor color space	22
2.4 Scanner profiling for positives	24
2.5 Desired vs. actual colors: Scanner profiling	25
Before and after profiling	25
2.6 Printer profiling for true color output	28
Film profiling for color negatives	29
Embedding existing ICC profiles	29
3 Resolution and Scanning	31
3.1 Talking about resolution:	
SPI, DPI, PPI, and absolute pixels	32
3.2 SPI: Adjusting sampling quality	32
SPI is the correct denomination	32
Determining the original size	33
Selecting scanning resolution	33
Avoid interpolated resolution	33
3.3 DPI: Output size in print	33
3.4 PPI: Output size on screen	34
3.5 Relative output size does not matter: 300 dpi vs. 72 dpi	35

4	File Formats	37
4.1	RGB, grayscale, and infrared	38
	8/16-bit vs. 24/48-bit	38
	Black-and-white scanners	39
	Index file — All images in overview	39
4.2	TIFF – Lossless but capacious	42
	Output ► TIFF multi page	43
	Output ► TIFF size reduction	43
	Output ► TIFF compression	43
4.3	JPEG – Compressing images	44
	High compression results in visible quality decline	44
	Good choice for economical scanning	44
	JPEG 2000	45
4.4	PDF – Versatile document format	46
	Facsimile vs. archival scanning	46
	The perfect electronic document	46
4.5	RAW files – Storing internal scanner data	48
	Traditional scanning workflow	48
	RAW scanning workflow	48
	RAW scanning from disk is fast	49
	Limitations of RAW	49
	Always focus before you scan	49
4.6	DNG vs. RAW TIFF	50
	Viewing Raw-TIFF	50
	Color depth in RAW	50
	How and when to use RAW	50
	RAW in daily use	51
	Lightroom and Aperture	51
	File size comparison	52
5	Scanning media types	53
5.1	Transmissive media – Color slide (E6)	54
5.2	Transmissive media – Kodachrome slide (K14)	56
5.3	Transmissive media – Color negative (C41)	58
5.4	Transmissive media – Black-and-white negative	60
5.5	Reflective media – Paper documents	62
	Skipping color information for smaller files	62
5.6	Reflective media – Scanning paper prints	63
	Rasterization in books, magazines and newspaper scans	63
5.7	The originals: To dump or not to dump?	64
	About the value of analog originals	64
6	Special Scanning Techniques	65
6.1	Multiscanning	66
6.2	Multi-exposure	68
	HDR for scanners	68
	2x multiscan automatically included	68
6.3	Scanner Exposure	70
6.4	Descreening	71

7	Scanning workflows	73
7.1	General workflow suggestions	74
	Input tab	74
	Crop tab	74
	Filter tab	75
	Color tab	75
	Output tab	75
7.2	Clever use of output size reduction	76
	Image editing: VueScan vs. Photoshop	77
7.3	Generic RAW scanning workflow	78
	Archiving in RAW	78
	Mandatory configuration steps before scanning RAW	79
7.4	Paper documents – Scanning text	80
7.5	Newspapers – Scanning text and pictures in black-and-white	82
7.6	Magazines – Scanning text and pictures in full color	84
7.7	Photo prints – Scanning printed images	86
7.8	Color slides – Scanning E6 and K14 transparencies	88
7.9	Color negatives – Scanning C41 negatives	92
7.10	Black-and-white negatives – Classic and chromogenic film	92
8	Reference – Input tab	93
9	Reference – Crop tab	109
10	Reference – Filter tab	117
11	Reference – Color tab	127
12	Reference – Output tab	137
13	Reference – Prefs tab	147
14	Menus, Buttons, and Shortcuts	149
14.1	File menu	156
14.2	Edit menu	157
14.3	Scanner menu	157
14.4	Profile menu	159
14.5	Image menu	159
14.6	Page menu	161
14.7	Help menu	163
14.8	Troubleshooting	164
15	Using this book	166
